

AI-Enhanced Teaching Certificate Requirements

View the Teaching in the Era of AI webpage by scanning the QR code.

You'll register for your certificate track on this webpage as well.

**MISS A SESSION?
NO PROBLEM!**

You can replace a missed session by completing one of the following options:

- Attend a free, online AI-related course from our pre-approved list and submit a 200-word summary of what you learned. See a course you'd like to try that isn't on the list? Submit it to us for pre-approval!
- Miss a book club session? Submit 400 words that include a summary of the chapters from your missed session and a reflection or questions about how you might apply what you learned. This should be submitted before the date of your next book club meeting.

Choose your own adventure! Either:

- Register for and attend at least **6 of 8** synchronous Teaching in the Era of AI workshops over the 2024-25 academic year
- Register for and participate in at least **5 of 6** Teaching with AI book club meetings

Submit your deliverables via the online course by June 1st, 2025:

1. Syllabus policy for use of AI in your course
2. An assignment that integrates the use of AI
3. AI-generated rubric for use in class

Remember, you can attend the optional Working Sessions to get help in developing these documents!
